SUBLIME

DIRESKO LAUNCHES A RANGE OF NEW NATURAL COLOURS NAMED
"NATURE" IN WHITE/LIGHT GREY AND BEIGE.

NATURE

[Nature is available in Q1]

This characterful Nature range will also be available with subtle golden „Cloud“ veins and stands for timeless design and pure class. With these warm earth and nature colours, Diresco flawlessly anticipates on the latest interior design trends in kitchens and bathrooms.

These Nature colours will be an important addition to the already extensive Diresco range and offer stylish added value in a variety of applications.

NATURE RANGE:

- Nature Silver
- Nature Silver Cloud (with veins)
- Nature Beige
- Nature Beige Cloud (with veins)

This range is produced with an alternative raw material containing a reduced silica level.

Prototype

SUBLIME

FROM SPRING '24, DIRESKO WILL BE THE FIRST
MANUFACTURER IN EUROPE TO TAKE THE LEAD
WITH A REVOLUTIONARY PRODUCTION PROCESS.

Prototype

[Sublime is available in Q2]

FULL FOCUS ON INNOVATION

With the introduction of this new technology, Diresco will produce mineral surfaces under the name „Sublime“ using a so-called sublimation process, in which we will combine the aesthetics of natural stone with the well-known high-quality properties of engineered stone. This will be a major game-changer in the world of engineered stone and puts Diresco in the lead in terms of innovation.

The Sublime range will allow Diresco to significantly expand its portfolio with new colours, unique designs and eye-catching patterns, taking into account market demand from the kitchen sector. In a 2nd phase, Diresco will be able to further distinguish its product range by combining this technology with eye-catching full-body designs and veining patterns.
